

# Urgent Care Assurance Company, RRG

Medical Malpractice insurance tailored for the urgent care industry

## Who We Are

Urgent Care Assurance Company, RRG (UCAC) is an insurance company created and owned by urgent care professionals and managed by risk management experts. We're the only Risk Retention Group offering medical malpractice coverage specifically to the urgent care industry. As treatment, care and operations evolve in the urgent care industry, it's crucial that policies are tailored to address unique risks. After working with industry leaders at the Urgent Care Association of America and insurance professionals, UCAC was founded in 2007 in a direct response to those needs.

## What We Do

UCAC provides comprehensive medical professional liability to urgent care centers at competitive rates, bundled with aggressive claim handling and loss control measures to lower overall total cost of risk. As both a member and owner of UCAC, one can expect to take advantage of various benefits such as:

- **Control:** Insureds are intimately involved in the claims handling process and can select their own defense counsel. Members also have greater control over medical malpractice products and services covered by the policy.
- **Stability:** An advantage of member-owned insurance companies is that rates have not been subject to the wild fluctuations of the traditional insurance marketplace, providing more predictability and stable costs. Since UCAC insures urgent care centers exclusively, we can offer lower rates than other malpractice insurers, regardless of market volatility.
- **Investment:** Competitive malpractice premiums and low frequency of losses in the urgent care industry presents a compelling investment opportunity that differentiates UCAC from traditional insurers. As a member, you have the potential to earn a return on your investment in the form of underwriting profits.

## What is a Risk Retention Group?

A Risk Retention Group (RRG) is a liability insurance company that is owned by the people it insures. The owner-insureds of a Risk Retention Group must share similar business activities. By joining with like-minded individuals to craft the insurance that is best for each member-insured, owners can turn insurance premiums in to investments with potential future returns and profits while still enjoying full coverage.
